November 2011

LEEDS Program

This is to certify that the cast aluminum produced by Wooster Products has the following recycle content and may be considered for the Leeds program.

Material 443 aluminum used to produce stair treads and nosings. Products are manufactured in Wooster, Ohio.

Total recycle content approximately 90%

Post-Consumer recycle content approximately 70%

Post-Industrial/Pre-Consumer recycle content approximately 20%

In addition to our post-Industrial recycle material, billets containing the above Post-Consumer recycle come from Coldwater, Michigan.

As these products contain more than 50% recycle content and are recovered within 500 miles of the job site they may be considered for MR Leeds credits.
